1. Remove trim cover to access fixing holes by inserting a flat headed screw
driver into the aperture on the under side of the switch and twist to remove. driver into the aperture on the under side of the switch and twist to remove
Remove the fixing screws (2) from the bag supplied.
Undo the terminal screws until they no longer obstruct the cable entry holes. Trim wires to correct length allow cable to reach terminals comfortably Strip back the insulation (plastic sheath) on the cable to approx 7 to 8 mm . Caution: An earth wire must be fitted if a metal mounting box is used.
If mounted into a plastic mounting box the earth lead must be fully insulate If mounted into a plastic mounting box the earth lead must be fully ins Connect the wires to the correct terminals according to the marking on the back of the product and wiring diagram.
When replacing a switch, take note of the wire positions and termina markings on the old switch 10. Carefully push the wired unit back into the mounting box, ensuring the cables are not trapped or pinched.
Fit and tighten the fixing screws as supplied. Do not over tighten the screw
as it may cause damage to the front plate or the mounting box threads.
Technical queries should be made to Retrotouch Technical Sales and Service Department Tel: +44 (0) 1293279426 email: support@retrotouch.co.uk Products certified in accordance with BS EN60669 standard.

## REMOVING THE

 GLASS COVERTo remove trim cover insert a flat headed screw driver into the aperture on the under side of the switch (as shown) and twist to remove.

## MOUNTING BOX

10A 1 or 2 Way 1,2,3 Gang ( 25 mm back box)
10A 1 or 2 Way 4 Gang, Intermediate, Retractive ( 35 mm back box)

## SPECIFICATION

Rated Voltage: 250V ~
Rated Current: 10AX
Dimension: $86 \times 86 \mathrm{~mm}$

Twist to remove

## ONE/TWO WAY 10AX SWITCH

One way is used to control one light (circuit) from one switch position only.
Two way is used to control one light from two seperate two way switches.
Please follow the wiring diagram below and ensure the safety warning and installation guide are read and followed before commencing any work.

I Way Switching
2 Way Switching

## INTERMEDIATE 10AX SWITCH

Intermediate is used to control one light from three or more switches and should be used with two way switches as shown in wiring diagram below.

Please follow the wiring diagram to the right for the switches and ensure the safety warning and installation guide are read and followed before commencing any work.

## INTERMEDIATE LINK WIRES REQUIRED

1 Gang model:
Add a link wires between $L 1_{2}$ to $L 2_{1}$ and $L 22$ to $L 1_{1}$
2 Gang model:
Add a link wires between $\mathrm{L} 1_{2}$ to $\mathrm{L} 21, \mathrm{~L} 22$ to $\mathrm{L} 1_{1}, \mathrm{~L} 32$ to $\mathrm{L} 4_{1}$ \& L 42 to $\mathrm{L} 3_{1}$
